

Всяка година много смъртни случаи, злополуки и заболявания, свързани с работата, могат да бъдат избегнати чрез извършване на правилна оценка на риска за безопасността и здравето.

Добре установено е, че микро и малките предприятия (ММП) са особено предизвикателни, когато става въпрос за осигуряване на добра и стабилна безопасност и здраве при работа (БЗР) и че поради това те имат специални нужди, когато става въпрос за подобряване на БЗР като цяло.
